Primus Epic®

Next-generation technology. Certified and flying today.

There's no reason to wait for the next generation. Honeywell's Primus Epic integrated avionics system is already certified, proven and flying. Today. Primus Epic exceeds the highest OEM in-service reliability standards in the world's most advanced aircraft by 73%. Its software-based system architecture allows cost-effective updates with minimal downtime. Primus Epic was designed with the future in mind. Advanced vision, communication, navigation, surveillance and air traffic management systems are easily updated as technology advances. The future is here. Certified. Proven. Flying. **Why wait?**
