

Primus Epic® Hawker 4000 Options

Options for the Primus Epic
equipped Hawker 4000 flight deck

Honeywell

Primus Epic Hawker 4000 Options

Primus Epic does a lot with selectable flight deck upgrades. These options add even more value to the Hawker 4000 flight deck.

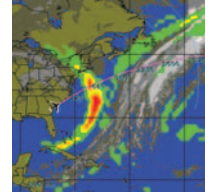

The all-new Primus Epic integrated avionics system for the Hawker 4000 changes the basic nature of flying by providing the processing speed, data link interfaces and data storage capability to bring large amounts of information into the cockpit where better information leads to better decisions.

Primus Radios

Charts and Maps

Weather Information Network

OPTIONS AVAILABLE TODAY

Communication and worldwide weather

The Honeywell Communication Management Function (CMF) provides routing via VHF for:

- AFIS text-based weather
- Flight planning/messaging
- Enables Honeywell Global Data Center (GDC) services: text-based AFIS service
- Read current radar, winds and satellite weather text information
- Includes third VHF radio for two-way data link
- Requires customer registration and service agreement with GDC

Second ADF

The second ADF option provides:

- Increased availability from backup ADF
- Improved dispatch reliability where ADF navigation is required

Enhanced Surveillance (XPDR Diversity Mode S)

- Transponder upgrade to meet European mandates for increased safety in increasingly dense airspace

GROWTH OPTIONS

Charts and maps

The charts and maps function provides the ability to view Jeppesen charts (Approach, SID, STARS, Airport Diagrams, etc.) and graphical weather on the cockpit displays.

- Shows aircraft position and can be rotated, zoomed, split and printed (with optional flight deck printer)
- Data is updated on 14-day cycle using Honeywell's Integrated Navigation Data Service (INDS)
- Shows current aircraft position on the airport diagram while on the ground
- Improved situational awareness with weather overlaid on INAV display

Worldwide customer support

Honeywell's avionics are based on proven technology providing exceptionally high reliability and simplified maintenance. Our product support services include regularly scheduled maintenance and pilot training courses. When service is needed, our customer support engineers and service centers are located around the world to provide efficient, responsive support.
