

SAVE TIME AND REDUCE DELAYS

Always by your side

Your extra teammate - looking ahead to avoid problems and delays

With busy schedules to keep, executives expect to arrive safely, refreshed, and on-time — every time! Flight Sentinel's personalized flight planning and dispatch service is specifically designed to expedite your flight planning, increase situational awareness while enroute, and eliminate delays.

“Your Global Flight Sentinel service has once again proven to be invaluable to us. On a high priority charter flight from Southern California to the East Coast, where a winter storm had slowed or stopped most traffic, your service got us off the ground on time and saved us an hour of ATC Delays on departure. Our passengers had been concerned about the weather and your continual updates on enroute conditions and destination weather and expected delays gave them a great deal of comfort. The information on expected holding at the destination was spot-on and made a very favorable impression on the passengers.”

Your Virtual Cockpit Member

Starting the night before your flight, our staff checks and double checks NOTAMs, TMU advisories, weather, Digital ATIS, airport arrival quotas, ground delay programs, play book and coded departure routes, and much more. On the day of departure Flight Sentinel manages your flight plan filing to ensure an on-time departure, and if an Airspace Flow Program is in effect for your flight, we'll call you with your EDCT (estimated departure clearance time).

Your IN-COCKPIT TEAM MEMBER

Flight Sentinel includes Contract Pilot Services to provide complete team member support.

1 Contracted Pilot Trip per Year
