

JETMAP III PROVIDES PASSENGERS WITH A WHOLE NEW WAY TO LOOK AT THEIR LOCATION, BUSINESS, NEWS, SPORTS, AND WEATHER ALONG THE WAY

Experience 3-dimensional perspective, high-resolution moving map displays and up-to-the-minute information from take-off to landing

JetMap® III

Keep track of where you are in time and space with a whole new look

Upgrading to Honeywell's new JetMap III state of the art moving map system allows passengers to monitor their flight progress with high-resolution 3D perspective, worldwide terrain maps (with 13 zoom levels all the way to street-level maps). Providing quick and accurate flight path tracking, time to destination, altitude, speed, heading and much more, such as:

- Sun Maps showing areas of sunlight and darkness across the globe
- Relative Location Indicator (RLI) identifying direction and distance to nearby cities, popular points-of-interest, or your configurable home bases
- Enhanced Night Mode setting provides easy viewing in a darkened cabin
- Customizable Features including corporate logos, aircraft symbols, and multi-language audio and video safety briefings

JetMap III's on-aircraft configuration allows passengers and crew to customize settings through the use of an integrated handheld remote control. Passengers can turn features on and off, make changes to the information display pages, and save new settings at anytime, on the ground or in the air. If there are changes that require more extensive customization, there is a USB port on the front of the device to facilitate the rapid download of the newest databases. And if you already have

JetMap II, all you need to do is simply exchange the easily accessible existing Compact Flash memory card to upgrade to JetMap III.

Stay in touch with the world below

Today's business jet passengers require continuous news and information wherever they are. Using its own embedded Iridium transceiver, or an already installed Satcom system, JetMap III provides direct access to the latest headlines, financial news, sports and weather. By overlaying up-to-the-minute headlines with their flight and route information, passengers can read complete news stories, review individual stock prices, market updates, and get current weather conditions in major U.S. and international cities and five-day forecasts for four predefined home-base locations.

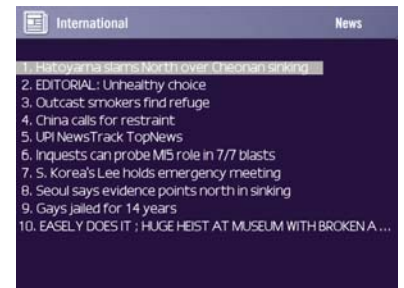

The Satcom link provides a very consistent, low-cost, worldwide connection for the periodic upload of the latest news, sports, business and weather content. Honeywell's Flight Support Services, powered-by Satcom Direct, provides simplified account management and the best customer support representatives in the industry.

From space shuttle altitudes to street level maps - and everything in between - JetMap III offers magnificent map views for the entire globe.

From world-wide satellite view to your current conditions or five-day forecast, JetMap III provides a whole new look at your weather situation.

Stay in-touch with the latest global business, new, sports, and weather headlines and then get the details that are important to you.
